Third-Party Intelligence Module

Gain Comprehensive Visibility Into the Risks Your Third-Parties Pose

Challenge

As organizations evolve and embrace new technologies and processes to become more efficient, innovative, and competitive, their third-party ecosystems continue to grow.

Vendors, suppliers, partners, contractors, and resellers all add value to the business — but they also introduce risk. All third-party companies face their own cyber risk, and these risks are also assumed by the companies they work with. When these risks are not acknowledged and mitigated, your own business may be subject to unintended damage as a result. In fact, nearly [60% of companies](#) have suffered data breaches stemming from a third party relationship.

Solution

Recorded Future's Third-Party Intelligence module provides a real-time view of the cyber risks their third parties face. Comprehensive security intelligence empowers teams to understand, analyze, and take action against potential risks by monitoring for key indicators including ransomware extortion, security incidents, malicious network activity, credentials leakage, domain abuse, email security, vulnerable infrastructure, web application security, dark web attention, and more.

The Recorded Future Security Intelligence Platform uses patented machine learning and natural language processing to automatically collect and analyze information from more than one million technical, open web, and dark web sources. The platform provides quantifiable risk scores that represent the risk and security postures for the companies in your third-party ecosystem. These risk scores are grouped into 3 categories: high, moderate, and informational, and they are comprised of 40 risk rules monitoring vital security control performance indicators.

BENEFITS

- Gain an objective view of your third party's risk profiles
- Identify third-party risks in real-time, before they impact your organization
- Respond quickly with the detailed evidence required to understand and act on risk events
- Align risk with the NIST Cybersecurity Framework
- Improve cross-team efficiency

“Recorded Future has helped us better prioritize third-party risk information and incorporate that into our broader cyber threat intelligence perspective.”

[National Insurance Company](#)

Recorded Future delivers the most comprehensive view of third parties for these key use cases:

Vendor Assessment: Rapidly assess the current and historic risk of your third-parties, granting instant visibility into their risk landscape. Recorded Future automatically identifies and prioritizes key risk indicators, drastically decreasing the time it takes to conduct a risk assessment.

Continuous Third-Party Risk Management: Constantly monitor for risk events for each third party and receive risk-prioritized alerts in real time. You'll immediately know about new risks and their severity, and you'll have the context and evidence you need to act quickly and confidently.

Key Features

Recorded Future's Third-Party Intelligence module includes the following key features:

The screenshot displays a 'Company Intelligence Card' for 'Statebacked'. At the top, it shows a 'HIGH RISK SCORE' of 88, with a note that 18 of 53 risk rules were triggered. Below this, a 'TRIGGERED RISK RULES' section features a bar chart comparing Statebacked's risk score over time to its peer, LensDefense. The 'Currently Triggered Risk Rules' section lists several high-risk events, such as 'Recent Single-Document Email Address Exposure' and 'High Volume of Exposed Credentials'. The interface also includes a 'Notes' section with company details like '15 Insult Group Sites', '10 000 000+' references, and '15 Insult Group Sites'.

Results

Complete Risk Assessments 50% Faster

Comprehensive intelligence on third parties empowers third-party risk teams to make fast, informed decisions that move at the speed their business needs. Transparent context and access to the evidence behind risk information enable you to quickly remediate risk and confidently move forward with your high-value third-party relationships.

Proactively Mitigate Risk with Continuous, Real-Time Monitoring

Questionnaire-based approaches to third-party risk are valuable, but these static assessments capture just a single point in time. Stay on top of your third parties with real-time third-party intelligence to learn about newly emerging risks like ransomware extortion right as they happen - not after the fact.

ABOUT RECORDED FUTURE

Recorded Future is the world's largest provider of intelligence for enterprise security. By combining persistent and pervasive automated data collection and analytics with human analysis, Recorded Future delivers intelligence that is timely, accurate, and actionable. In a world of ever-increasing chaos and uncertainty, Recorded Future empowers organizations with the visibility they need to identify and detect threats faster; take proactive action to disrupt adversaries; and protect their people, systems, and assets, so business can be conducted with confidence. Recorded Future is trusted by more than 1,000 businesses and government organizations around the world.
